1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. The suggested Drawing Changes are approved. It is noted, however, that although the amendments to the specification are also approved applicant's amendments that in multiple cases cancel "Example" but do not cancel the "s" at the end of the word may well lead to some confusion. Additionally, the Examiner also notes that applicant's characterization on page 15 of the Response of the prior rejections made by the Examiner under both 35 USC 112, 1st and 2nd Paragraphs as "Objections" is improper.
3. Claims 1-3, 5-20 and 22-34 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. More particularly, the weight percentage range of particles set forth in paragraph [0024] is again, for the reasons set forth in Paragraph No. 10 of Paper No. 112105, believed to be critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The fact that the invention may be barely able to function in a clearly inferior manner at other weight ratios is not believed to be the test.
4. Claims 1-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. More particularly, the amendments to the

Art Unit: 1771

independent claims 1 and 18 that the particles contained in the adhesive film are "elongate" is believed to be new matter, since no express or inherent support has either been pointed out or is believed to exist, as the only relevant teaching in the specification, namely, that the particles are "needle shaped" is not believed to supply the necessary support required to overcome a new matter based rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
